

E-Mon D-Mon[®] Driver

Product Overview

The E-Mon D-Mon[®] driver, from CSI³, is the first available driver on the market for Niagara^{AX} that allows users to integrate the E-Mon D-Mon[®] meters without having to purchase a Modbus[®] driver.

Just like all of the CSI³ drivers, the following features are always inherent:

Features such as ease of use, through built-in discovery, and web enablement of legacy/proprietary systems makes this driver a perfect fit to bring your system into the 21st Century.

- **Built on the Niagara^{AX} Framework[™]**
- **Full support of all Open Protocols**
- **Ease of Use - Built-in Network Discovery of devices**
- **Device level serial and/or IP connections are supported**

The ease of use of these features saves a tremendous amount of engineering hours on jobs where time is money.

The E-Mon D-Mon[®] driver, from CSI³ allows the user to integrate directly E-Mon D-Mon[®] Class 3000, V-Class and Class 5000 meters and/or with E-Mon's Interval Data Recorders (IDRs) which provides access to Class 1000 and Class 2000 devices. This software will function on all Niagara^{AX} 3.n.nnn platforms.

Using this driver, you can easily integrate any Class 3000 E-Mon D-Mon[®] meter and IDR that has Class 1000 and/or Class 2000 meters, into Niagara^{AX}

For Class 3000, V-Class and Class 5000 meters, all energy points can be discovered and added to a Niagara^{AX} application. For IDR integration, only kW and kWh points can be discovered and added.
