

## E-Mon D-Mon Driver

*Features such as ease of use, through built-in discovery, and web enablement of legacy/proprietary systems makes this driver a perfect fit to bring your system into the 21<sup>st</sup> Century.*

*Using this driver, you can easily integrate any Class 3000 E-Mon D-Mon meter and IDR that has Class 1000 and/or Class 2000 meters, into Niagara AX and Niagara 4.*

### Product Overview

The E-Mon D-Mon driver, from Kodaro, is the first available driver on the market for Niagara AX and Niagara 4 that allows users to integrate the E-Mon D-Mon meters without having to purchase a Modbus driver.

Just like all of the Kodaro drivers, the following features are always inherent:

- **Built on the Niagara AX and Niagara 4 Frameworks**
- **Full support of all Open Protocols**
- **Ease of Use -Built-in Network Discovery of devices**
- **Device level serial and/or IP connections are supported**

The ease of use of these features saves a tremendous amount of engineering hours on jobs where time is money.

The E-Mon D-Mon driver, from Kodaro allows the user to integrate directly E-Mon D-Mon Class 3000, V-Class and Class 5000 meters and/or with E-Mon's Interval Data Recorders (IDRs) which provides access to Class 1000 and Class 2000 devices. This software will function on all Niagara AX 3.n.nnn platforms as well as new Niagara 4 platforms.

For Class 3000, V-Class and Class 5000 meters, all energy points can be discovered and added to a Niagara AX/N4 application. For IDR integration, only KW and kWh points can be discovered and added.
