

TenantEye

Tenant billing, invoicing and sub-metering made easy

There are many tenant billing packages available, but none offers the integration and flexibility of TenantEye.

The ease of use of TenantEye is second to none. You can go from zero to advanced tenant billing in no time for a fraction of the cost of a typical tenant billing application.

Product Overview

The Kodaro TenantEye driver is the most open, flexible and easy to use interface for tenant billing available today. It is also the first oBIX-compliant tenant billing package ever.

Ultimate integration:

Being built on Tridium's Niagara AX and Niagara 4 Frameworks, Kodaro's TenantEye can securely access a nearly unlimited number of drivers used in building automation today. Every open protocol from BACnet to Lonworks to Modbus to OPC to oBIX, and many of the currently installed proprietary devices can be easily integrated into TenantEye. In addition, all of this is available through a standard web browser so it can be accessed securely anywhere.

Flexible features and functions:

- **Powerful rate scheduling – nearly unlimited rates**
- **Multiple meters per tenant – no limit to what can be metered or controlled**
- **Real-time metering and invoicing**
- **Web access**
- **Automated monthly invoices**
